IN THE CLAIMS:

Please amend Claims 1, 13, 19, 20, 32, 38, 39 and 41 as follows:

- sub D<sup>17</sup>
1. (Amended) A method of selecting components for installation on a computer, the method comprising the acts of:  
receiving a request for the upgrade of one or more components;  
determining one or more system conditions regarding the computer including determining whether at least one component that is necessary for the execution of the requested components is located at the computer; and  
identifying one or more components for installation on the computer based upon the request and the system conditions.
